# Introduction

## “Greenpatch, a new generation”

This year has been our 30th anniversary growing and providing seeds and plants for Australian gardeners and retailers. We are very proud of our achievements in providing quality certified organic seeds and plants, and an ever-increasing range for our customers growing needs. We are delighted to announce our son Stami has taken over Greenpatch Organic Seeds.

Stami has been working at Greenpatch for 13 years having an extensive understanding of the business and thrives off the importance of keeping seeds local, organic and open pollinated so we can all have the opportunity to save seed. You can expect the same quality of seeds, plants and customer support moving forwards with an even stronger emphasis on producing more seed than ever at our two farms near Taree in NSW.

The business will operate from the same premises continuing to supply quality seeds & plants to stockists. You will find the same friendly staff that will be happy to help with any questions about any of our products.

We are most gracious for your customer support over the years, a big thanks to you all. We wish you all a fruitful growing season ahead!

Best wishes

Neville, Sophia & Stami

A more secure seed network starts with you.

## “Visit Us”

If you are travelling through or near Taree – please stop in and have a stretch! We are only 900m from the Pacific Highway. Enjoy a walk through the extensive gardens and see how the seed growing areas are doing. The nursery and shop are also open Monday–Friday, 8.30am–4.30pm.

## “Organic Certification”

Greenpatch Organic Seeds is fully certified organic as a producer and as a processor so we can provide you with excellent quality certified organic seed. We have now been certified on this property for 19 years and will continue into the future. Our certification has recently undergone a change from AUS-QUAL to Southern Cross Certified. You may receive packets with AUS-QUAL's logo up until June 2024 but most of our seeds and plants will have the new certifiers information. If you have any questions please let us know by email and we will be happy to assist.

# Organic Vegetables

ALL SEED PACKETS - \$4.20ea. Members \$3.78ea

## AMARANTH - Grain Golden

(*Amaranthus hypochondriacus*)

**Certified Organic**

Fast growing annual to 1.5 metres high. Green leaves eaten like spinach when young, produces a soft golden flower head when seeds mature. Seeds have a high protein content. Used in cereal. Sow Spring-Summer.

## AMARANTH - Leaf (*Amaranthus gangeticus*)

**Certified Organic**

Annual, grows to 1.5 metres, leaves and stems used like spinach. Sow Spring-Summer. High in protein, vitamins and minerals.

## ARTICHOKE - Globe (*Cynara scolymus*)

**Certified Organic**

Grows to 1.5 metres, a prized delicacy. Used steamed, in casseroles and preserves. Fast growing, likes rich well drained soil. Sow Autumn, Winter, Spring.

## BEAN - BUSH (*Phaseolus vulgaris*)

High yielding and rich in protein. Plant every 3 weeks for continuous supply. Sow Spring-Summer.

### - Brown Beauty

**Certified Organic**

Old variety, french strain, disease resistant.

### - Butter Bush

**Certified Organic**

Compact grower to 45cm, producing crop of yellow pods, black seed, stringless when picked young, good flavour.

### ► Canario

**Organic**

Highly productive variety producing green flat beans that are stringless when young with a sweet crunchy texture. It gets to 60cm high producing an early crop that can be harvested continuously over 4-5 weeks depending on conditions.

### - Hawkesbury Wonder

**Certified Organic**

Popular old stringless variety, produces over a long period, green pods to 15cm long.

### - Prestons

**Certified Organic**

Old variety producing tasty, round green pods over a long period. Bushy plant to 45cm.

## BEAN - CLIMBING (*Phaseolus vulgaris*)

Take up little room and yield over a long period, provide trellis. Sow Spring-Summer.

### - Delgado Black Mexican

**Certified Organic**

Climber to 2 metres, green pods, black seeds. Mature seeds used as dry bean, also useful as black dye.

### - Epicure

**Certified Organic**

Epicure bean has long flat green pods to 20cm with nice flavour. Stringless when young. Strong grower.

### - Fredrico

**Certified Organic**

Strong grower to 2 metre. Green stringless, good yields over a long period.

### - Greek Bean

**Certified Organic**

Strong growing variety, producing good crop of flat green, stringless pods to 15cm long.

### - Kentucky Wonder

**Certified Organic**

Vigorous grower, producing green, fleshy, flat pods. Stringless when young to 20cm, rust resistant.

### - Lablab (*Dolichos lablab*)

**Certified Organic**

Vigorous perennial in warm climates to 2.5 metres. Pods eaten steamed or boiled when young. Black seeds, excellent legume, ground cover & soil improver. Note: Fast growing, provide ample space. Leaves can irritate sensitive skin.

### - Lazy Housewife

**Certified Organic**

Stringless bean to 2 metres, originating from Germany. Good flavour, heavy bearing, green flat pods to 20cm long.

### - Purple King

**Certified Organic**

Flat purple pod to 18cm popular variety. Pods turn green when cooked. Adds colour and flavour to salads.

### - Rice Bean

**Certified Organic**

Dense spreading variety for ground cover or trellis. Good nitrogen fixer, green manure and soil improver. Small green pods eaten steamed. Suited to warm climates.

- Snake Bean - Black (*Vigna unguiculata*) **Certified Organic**  
Strong grower, yields 45cm long pods of black seeds, eat fresh or cooked.

- Snake Bean - Brown (*Vigna unguiculata*) **Certified Organic**  
Long, extra thin pods to 60cm, climber to 2 metres high, brown seeds. Use as for black snake bean.

### - Snake Bean - Red Noodle

**Certified Organic**

Climber to 2 metres producing juicy red pods to 60cm long. Tender crunchy beans retain colour when cooked, prolific bearing.

### - Wellington Wonder

**Certified Organic**

Flat green pods to 20cm. Prolific cropping, good flavour. Climbs to 2 metres.

### - Zebra

**Certified Organic**

Stringless pods when picked young, strong grower, old variety.

## BEETROOT (*Beta vulgaris*)

Popular root vegetable, fast growing, bi-annual, easy to grow. Sow direct in garden, 60 days to maturity. Keep moist in fertile well drained soil. Use in salads, cooked or preserved. Sow all year except in hot weather.

### - Detroit - Red

**Certified Organic**

Round red roots to 12cm across. Smooth, tender, sweet flavour.

### - Chiogga

**Certified Organic**

Also known as Candy Stripe. Attractive red skinned beetroot with red & white rings.

## BOK CHOY - Chinese Cabbage (*Brassica rapa*)

**Certified Organic**  
Annual loose cabbage with large green leaves & crunchy white stems. Harvest large leaves over a long period. Sow Autumn-Spring.

## BROCCOLI (*Brassica oleracea*)

Rich in calcium, vitamins and minerals. Sow all year except hot weather.

### - Albert

**Certified Organic**

Compact plant, dark green medium sized heads. Produces many side shoots suitable for broccolini.

### - Calabrese

**Organic**

Good producer of medium sized heads & continues to produce side shoots once main head is harvested.

### - DiCicco

**Certified Organic**

Compact Italian variety. Blue-green heads to 10cm across, produces over a long period. Harvest at 60 days.

### - Umpqua

**Certified Organic**

Heavy bearing variety with a high quality main head then ample side shoots for multiple weeks. Leaves can be eaten when young in salads or lightly blanched. Available November 2022

## BROOM MILLET (*Sorghum bicolor*)

**Certified Organic**

Tall grass like annual to 3 metres. Decorative straw like flower. Seed heads used to make brooms. Sow Spring-Summer.

## CABBAGE (*Brassica oleracea*)

Popular vegetable, high in calcium and iron. Likes fertile well drained soil, sunny position, frost hardy. Sow all year, except hot conditions.

### - Green Express

**Certified Organic**

Early producing variety, forming small tight green heads to 1.5kg. 60 days to maturity from transplant. Likes fertile, well drained soil, sunny position, frost hardy. Compact variety that can be spaced 35cm apart. Sow all year except in hot conditions.

### - Red

**Certified Organic**

Medium sized. Adds attractive colour to salads.

## CAPSICUM (*Capsicum annuum*)

Popular Summer vegetable, high yielding, shrubby plants for warm sunny position. Yield over a long period. Sow Spring - Summer.

### - Californian Wonder

**Certified Organic**

Sweet fruit, cube shaped 10 cm, bell type, heavy producer use green or red, high in Vitamin C.

**\* Special Offer \***

Spend \$100 or more in total & receive a Free seed packet.

**- Mixed Colours** **Certified Organic**

A colour mix of Red, Green, Golden & Chocolate. Needing similar growing conditions. Grows to 60cm high, Full sun well drained fertile position. Sow Spring-Summer.

**- Diamond** **Certified Organic**

Small white diamond shaped fruit, produced in abundance. Capsicum changes from white to light orange on maturity.

**- Golden Californian Wonder** **Certified Organic**

Compact bush to 60cm high, sweet capsicum to 10cm, block shape fruit, green ripening to yellow-gold. Adds colour to salads and cooked dishes.

**- Jimmy Nardello** **Certified Organic**

Heavy producing Italian variety, long red sweet fruit to 25cm. Continuous cropper, excellent taste, great for stuffing. Popular Summer vegetable, high yielding, shrubby plant for warm sunny position. Sow Spring-Summer.

**- Peperone** **Certified Organic**

Long thin and crinkly fruit with the aroma of a chilli but usually no heat when eaten. Stores well and can be harvested green to red. Grows to 60cm high, Full sun well drained fertile position. Sow Spring-Summer.

**- Purple Beauty** **Certified Organic**

Compact bush to 45cm high, fruit 13cm long and 8cm wide. Green fruit, turning deep purple to red when mature.

**- Sweet Chocolate** **Certified Organic**

Heavy producing variety with 15cm x 8cm green fruit ripening to a dark chocolate colour with brown-red flesh inside. Produces over a long period.

**CARROT (*Daucus carota*)**

Popular root vegetable, for deep well drained soil, sunny position. Do not over feed, keep moist. Sow All Year.

**- Danvers** **Organic**

Hardy variety to suit most soils. Slender, deep orange colour to 15cm long, tolerates hot conditions. Eat fresh. Suited to freezing. Popular root vegetable, for deep well drained soil. Sunny position. Sow all year.

**- Scarlet Nantes** **Certified Organic**

Fast producing variety with bright orange-red root to 18cm, coreless variety. Very sweet flavour. Good for juicing and baby carrots.

**- Western Red** **Certified Organic**

Long tapering root, smooth deep orange colour. Disease resistant. 70 days to maturity.

**CELERY (*Apium graveolens var dulce*) Sow Autumn-Spring.**

**- Chinese (*Brassica juncea*)** **Certified Organic**

Grows to 60 cm, with large spicy flavoured leaves, 3-4 cm wide midrib & tapered at the end. Midrib is crunchy, juicy & sweet, can be eaten fresh or cooked.

**- Red Stem** **Certified Organic**

Compact habit with thin stalks that colour to a reddish purple. Good flavour. Use stalks and leaves fresh when required.

**- Tall Utah** **Certified Organic**

Dark green stringless stems to 70cm.

**- Tendercrisp** **Certified Organic**

Likes rich well drained soil and ample water. Green smooth stringless, very hardy.

**CHIA (*Salvia rhyacophila*)** **Certified Organic**

Hardy annual to 1.5 metres, leaves used in salads, seeds for sprouts. Seeds rich in vitamins and protein, forage plant. Whole plant regarded as survival food. Sow Spring-Summer.

**Chicory (*Chichorium intybus*) Sow Autumn-Spring.**

**- Sugarloaf** **Certified Organic**

Forming a large elongated head with dense green outer leaves and a pale yellow centre. Bittersweet walnut like flavour. Sow Autumn-Spring

**COWPEA - Edible Giant (*Vigna unguiculata*)** **Certified Organic**

Annual legume spreading to 1.5 metres, mauve flowers. Green pods eaten when young, plants can yield up to 1kg of black seeds. Used cooked as for pulses, soil improver. Sow Spring - Summer.

**CHILLI (*Capsicum annuum*)**

Hardy Summer vegetable, high yielding. Adds flavour to cooked dishes. Ideal for bottling. Sow Spring-Summer, plant in good, well drained soil in sunny position. Sow Spring - Summer.

**- Aji Limon (*Capsicum baccatum*)** **Certified Organic**

Popular annual to 90cm, producing yellow chillies to 6cm long. Originating from Peru. Heat Level: 5/10 Use fresh or dried. Ideal for spicy cooked foods, sauces, bottling & insecticidal spray.

**- Bell (*Capsicum baccatum*)** **Certified Organic**

Grows to 80cm, colourful lantern shaped fruit. Green ripening to red. Ornamental specimen, South American species. Heat level 6/10.

**- Cayenne (*Capsicum annuum*)** **Certified Organic**

Slender fruit to 10cm long, green turning to red. Medium heat, level 6/10.

**- Explosive Ember (*Capsicum annuum*)** **Certified Organic**

Popular annual to 45cm, producing small purple/red chillies to 3cm long. Ideal in pots. Heat level 6/10. Use fresh or dried. Perfect for growing in pots. Ideal for spicy cooked foods, sauces, bottling & insecticidal spray.

**- Fatalii (*Capsicum chinense*)** **Certified Organic**

Popular annual to 1m, producing tubular golden chillies to 6cm long. Heat level 10/10. Use fresh or dried. Ideal for spicy cooked foods, sauces, bottling & insecticidal spray

**- Fiesta (*Capsicum annuum*)** **Certified Organic**

Compact low spreading ground cover. Fruit 9cm long, changing from cream/purple to orange then red. Heat level 5/10. Ideal to plant in pots or garden.

**- Habanero-Chocolate (*Capsicum chinense*)** **Certified Organic**

Fruit ripens from green to chocolate brown, measuring up to 6cm long & 2.5cm wide with waxy coating. Flavour rich, fruity, smokey. Grow up to 90cm high. Heat level 9/10.

**- Habanero - Orange (*Capsicum chinense*)** **Certified Organic**

Compact plant to 60cm high. Bright orange coloured fruit to 5cm long. Hot fruity flavour. Heat level 8/10.

**- Habanero - Red (*Capsicum chinense*)** **Certified Organic**

Bushy plant growing to 1 metre. Fruit are a glossy red getting to 4cm across. Will fruit in pots but much larger yields will be achieved in the garden. Heat Level 6/10

**- Habanero - White (*Capsicum chinense*)** **Certified Organic**

Popular annual to 80cm, producing masses of elongated white fruit to 3cm long. Originates from Peru. Heat level 8/10. Use fresh or dried. Ideal for spicy cooked foods, sauces, bottling & insecticidal spray.

**CORN (*Zea mays*)** **- Not to TAS -**

Popular easy to grow. For fertile, well drained soil, sunny position. Pick your own fresh corn. Sow Spring - Summer.

**Maize**

**- Early Leaming** **Certified Organic**

Tall heritage variety to 3 metres. Long cob to 25cm, yellow kernels, eaten when young or stock feed.

**► Manning Pride** **Organic**

Rare heirloom variety that was bred in the Manning Valley from Manning White. Large cob to 20cm long with large golden kernels, cobs can be eaten fresh or stored dried for animal feed. Despite being a maize Manning Pride is an excellent 'sweet corn' when young with a sweet creamy texture.

- **Manning White** **Certified Organic**  
Tall grower to 3 metres, producing 1 large cob of white corn. Eat fresh or use as animal feed. Bred in the Manning Valley 1932.
- **Silvermine** **Organic**  
A rare dent corn used for feed production. Producing 1-2 large 23cm cobs of white corn. Kernels are deep on average 15mm. Strain may have history with Manning Silvermine but it's hard to be certain. Eat cobs roasted at milking stage or for animal feed. Easy to grow. Sunny position.

#### Popcorn

- **Blue Mini** **Organic**  
Highly sought after heirloom popcorn variety. Growing to 1.5m they will not take up too much room in your garden. Pop's extremely well. 90 days to maturity.
- **Strawberry Mini** **Certified Organic**  
Fast growing to 1.2 metres high, producing up to 6 cobs per plant with bright red kernels. Ideal for popcorn or crafty creations.

#### Sweet Corn

- **Anasazi** **Certified Organic**  
Ancient multi-coloured sweet corn. Derived from the Anasazi Indians in America. Beautiful eating corn. Maturity 90 days.
- **Hawaiian** **Certified Organic**  
Compact grower to 1.5m. Produces 2 good sized delicious yellow cobs. Good flavour. 100 days to maturity.
- **Balinese** **Certified Organic**  
Strong grower to 3m, producing 2 good sized yellow cobs per plant. Harvest young for good flavour. 110 days to maturity.
- **Golden Bantam** **Certified Organic**  
Popular variety producing up to 2 yellow cobs per plant, early maturing 70-80 days. Good flavour.

#### **CUCUMBER (*Cucumis sativus*)**

Summer salad vegetable likes rich well watered soil. Sow Spring - Summer.

- **African Horned (*Cucumis metuliferus*)** **Certified Organic**  
Fruit 15cm long, spiny skin, orange at maturity. Sweet green jelly-like flesh inside. Four times the Vitamin C of oranges.
- **German Pickling** **Organic**  
Compact spreading vine, producing yellow tinged fruit, pick at 20cm. Juicy and crisp eaten fresh, pick at young stage for pickling.
- **Giant Russian** **Certified Organic**  
Vigorous mildew resistant variety, acid free. Crisp sweet flesh, eat at 20cm long. Good keeper.
- **Lebanese** **Certified Organic**  
Compact bush variety. Fruit picked at 20cm, green colour, good flavour, non acid. For home gardens and commercial growers.
- **Lebanese** **Certified Organic**  
Compact bush variety. Fruit picked at 20cm, green colour, good flavour, non acid. For home gardens and commercial growers.
- **Long White** **Certified Organic**  
Long white fruit to 18 cm, very tasty. Early season. Low-acid.
- **Marketmore** **Organic**  
Popular variety. Flavoured green fruit to 25cm long. Good producer.
- **White Spine** **Certified Organic**  
Smooth white skin, oblong fruit to 15cm. Good flavour, excellent eating.
- **West Indian Gherkin (*Cucumis anguria*)** **Certified Organic**  
Produces green 5 cm diameter fruits, soft spines on outside, sweet and juicy when young. Used for pickling. Eat fresh.

#### **EGGPLANT (*Solanum melongena*)**

Attractive leaves and flowers. Fruit used in cooked dishes. Sow Spring-Summer. Likes fertile well drained soil in sunny position

- **Black Beauty** **Organic**  
Decorative annual, attractive leaves and flowers. Fruit used in cooking. Large oval black fruit. Sow Spring-Summer.
- **Long Purple** **Organic**  
Popular variety, producing long dark fruit to 25cm long and 8cm wide. Good cropper.
- **Snowy** **Certified Organic**  
An elongated white eggplant that has a nice smooth texture and milder flavour. Easy to grow and large producer. Fruits are 12cm x 6cm in size.

- **Thai Pea (*Solanum torvum*)** **Certified Organic**  
Shrubby plant, perennial to 90cm high & wide. Branching habit, green pea sized berries produced in clusters, have a slightly bitter taste. Used in Thai dishes. Frost tender, sow Spring-Summer.

- **Tsakoniki** **Organic**  
Bushy plant to 70cm high. Fruit purple with white stripes, cylindrical up to 25cm long.

#### **GOURD (*Lagenaria siceraria*)**

Eaten like squash & zucchini when picked young. Many shaped fruits. Dried fruits can be decorated and used for bowls and musical instruments. Sow Spring-Summer.

- **Ancient** **Certified Organic**  
Vigorous vine, provide large support to climb on. Large trombone shape fruit.
- **Large Mixed** **Certified Organic**  
Vigorous vine, as above. Large white flowers.
- **New Guinea** **Certified Organic**  
Also known as New Guinea bean. Annual vine grown on fence or ground. Long smooth, pale green fruits to 1.3 metres long. Harvest fruits at 20cm & use like zucchini. Used in Indian & Asian dishes.
- **Snake (*Trichosanthes anguina*)** **Certified Organic**  
Vigorous climbing annual. Mature fruit to 1 metre long with decorative hard shell.

#### **KOHLRABI - Azur Star (*Brassica oleracea*)** **Certified Organic**

A delicious purple bulbing vegetable perfect for baking, grated or steamed. Peel outer skin off before eating inner flesh. Bulb is round with a slightly flat appearance - up to 7cm across. Harvest after 60 days. Leaves can also be used similar to kale and best eaten when young. Sow Autumn-Spring.

#### **KOHLRABI - Purple Vienna (*Brassica oleracea*)** **Organic**

Fast growing vegetable, bulb & stem are purple. Sweet flesh is white, delicious steamed. Sow Autumn - Spring.

#### **Leek (*Allium ampeloprasum porrum*)**

Great steamed, baked, fried for garnish, boiled, blends well with other vegetables. Adds flavour to soups & quiches. Likes deep, fertile, moist soil. Sow Autumn - Winter.

- **Autumn Giant** **Certified Organic**  
Large grower with a thick stem. Tender stem which is perfect when cooked.
- **Carentan** **Certified Organic**  
European heirloom leek variety with thick stems up to 5cm wide. Matured in 100 days.

#### **LETTUCE (*Lactuca sativa*)**

Hearting and loose leaf types, decorative colours and shapes. For Cool/Cold climates sow Spring-Autumn. All other climates sow Autumn-Spring. Varieties available for all seasons, plant in rich well drained soil, sunny moist position.

- **Australian Yellow** **Certified Organic**  
Wavy loose leaf head with yellowish green glow in colour.
- **Brown Romaine** **Certified Organic**  
Loose leaf type. Green and brown tinge. Heat resistant.
- **Buttercrunch** **Certified Organic**  
Small dark green crisp head with fan shaped leaves, heat resistant variety.
- **Cos Paris Island** **Certified Organic**  
Soft green cos variety with pale cream inside, semi hearting. Ideal to pick as baby leaf, excellent flavour & texture for salad mix.
- **Cos Red** **Certified Organic**  
Romaine type. Dark red leaves, highly attractive, pick leaves as required.
- **Cos Verdi** **Certified Organic**  
Open, upright hearting variety, crisp leaves with smooth edges, unique sweet taste.
- **Everlasting** **Certified Organic**  
Loose leaf type, leaves are light green and dissected.
- **Four Seasons** **Certified Organic**  
Compact hearting variety that can still be side picked. Red leaves with excellent buttery texture.

- **Freckles** **Certified Organic**  
Loose green leaf type, broad flat leaves with an ornamental fleck or red spots on the leaves.
- **Frilly Pink** **Certified Organic**  
Non-hearting, open leaf type. Large green leaves with attractive pink edges.
- **Green Mignonette** **Certified Organic**  
Popular compact hearting variety. Soft green leaves with sweet flavour.
- **Green Oak** **Certified Organic**  
Green open leaf type. Leaves are oak shaped.
- **Green Salad Bowl** **Certified Organic**  
Soft green frilly leaf ideal for side picking. Continual harvest during Autumn/winter.
- **Red Mignonette** **Certified Organic**  
Compact hearting variety. Soft red/brown leaves with a sweet flavour.
- **Red Oak Leaf** **Certified Organic**  
Annual leafy green to 30cm, non-hearting. Leaves red tinged and dissected.
- **Red Salad Bowl** **Certified Organic**  
Decorative variety that adds colour to salads or use as a garnish. Leaves are bronze/red, dissected and wavy. Harvest as a side pick variety or cut whole plant.
- **Ricciolina da Taglio** **Certified Organic**  
Loose leaf variety with green deeply lobed curly leaves. Pick as required.
- **Side Pick** **Certified Organic**  
Frilly green dissected leaves. Light green colour. Highly decorative loose leaf type.
- **Summer Mix** **Organic**  
Mix of Lettuce Brown Romaine, Frilly Pink and Ricciolina da Taglio. All varieties are more suitable to the summer heat. Harvest the outside leaves after 6 weeks continuously.
- **Summer Queen** **Certified Organic**  
Large grower with a small green head and side leaves can be picked as needed. Handles early and late summer conditions with improved bolt resistance. 60 days to maturity.
- LUFFA (*Luffa aegyptiaca*)** **Certified Organic**  
Train on trellis, large yellow flowers. Bathroom sponge and scrubber. Eat like marrow when young. Sow after frost.
- MESCLUN MIX - Lettuce** **Organic**  
A mixture of green & red lettuce varieties. Ideal for picking fresh leaves from a young to mature stage.
- MESCLUN MIX** **Organic**  
A mixture of leafy greens, including lettuce (green & red types), mizuna and pak choi.
- MIBUNA (*Brassica japonica*)** **Organic**  
Long leaves and narrow stem, soft green colour. Young leaves and stems eaten fresh or cooked. Sow Autumn and Winter.
- MIZUNA (*Brassica juncea*)** **Certified Organic**  
Japanese salad plant, vigorous and very hardy, mild mustard flavour. Sow Autumn and Winter.
- MOUSE MELON (*Melothria scabra*)** **Certified Organic**  
An annual vine producing small green oval fruit to 4cm long. Has a typical crunchy cucumber taste with some sourness. Sweetens with age. Native to Mexico, heavy producer. Use in salads, pickles or dessert. Sow Spring-Summer.
- MUSTARD (*Brassica juncea*)** **Certified Organic**  
Attractive plant with flavoured leaves when eaten fresh in salads. Good in stir-fries. Sow Autumn - Spring.
- **Osaka Purple (*Brassica juncea rugosa*)** **Certified Organic**  
Leaves large, round, greenish purple with a darker edge. Mild mustard flavour.
- **Red Giant** **Certified Organic**  
Produces large, peppery flavoured, red-purple leaves. Not hot when cooked.
- OKRA (*Abelmoschus esculentus*)** **Certified Organic**  
Quick growing Summer vegetable. Immature fruits eaten steamed & cooked - a real delicacy. Sow Spring-Summer.
- **Burgundy** **Certified Organic**  
Attractive red pods. Good producer to 1 metre. Tolerates cooler conditions. Holds colour after cooking.
- **Clemsons Spineless** **Certified Organic**  
Annual to 1 metre. Green fruits pick when young.
- ORACH - Green (*Atriplex hortensis*)** **Certified Organic**  
Fast growing to 80cm. Hardy Summer annual producing edible green leaves. Use as for spinach or fresh in salads. Sow Spring - Summer.
- ONION (*Allium cepa*)** **Certified Organic**  
Attractive plant with flavoured leaves when eaten fresh in salads. Good in stir-fries. Sow Autumn - Spring.
- **Cream Gold** **Certified Organic**  
Produces up to large golden brown, globed shaped onions. Strong flavour & good keeper. For moderate to cool climates.
- **Spring Onion White Lisbon** **Certified Organic**  
Bunching variety producing smaller bulbs, ideal for pickling or spring onion. Long, clear white skins & green tops. Mild flavour.
- PAK CHOI (*Brassica parachinensis*)** **Certified Organic**  
Compact fast growing, loose leaf cabbage, with thick, crisp, succulent stalks. Leaves form a dense clump. Use fresh or in stir-fries. Sow Autumn-Spring.
- PARSNIP - Hollow Crown (*Pastinaca sativa*)** **Certified Organic**  
Hardy root vegetable, likes cool weather, frost hardy. Long white pointed root. Sow Autumn and Winter.
- PEA (*Pisum sativum*)** **Not to TAS**  
Annual bushes or climbers easily grown in good well drained soil. Used fresh or cooked. Sow Autumn-Spring.
- **Climbing Sugar Snap** **Certified Organic**  
A good producer of large sweet green pods. Pick when young or filled out and eat whole pods fresh, steamed or in stir fries. Provide trellis to climb on. Grows to 1.5m.
- **Golden Podded** **Certified Organic**  
Highly productive climber to 2m. Golden pods are sweet and flavoursome. Eat young or as a shelling pea when older. Needs trellis for support.
- **Snowpea Purple Flowered** **Certified Organic**  
Climber to 2 metres, large flat sweet pods to 13cm long, attractive purple flowers. Sweet and tasty winter vegetable Sow Autumn-Spring.
- ▶ **Purple Podded** **Certified Organic**  
Heavy bearing climbing pea to 2m high. Produces medium sized purple pods for shelling. Best eaten cooked. Provide trellis to climb on.
- Permaculture Seed Mix (Bulk packet - 25 grams)** **\$14.00**  
Contains a mixture of seeds suitable for companion planting, including vegetables, herbs and flowers. Simply broadcast in the garden, rake in or cover with light mulch, keep moist. Please specify season - Autumn/Winter or Spring/Summer. **Organic**

### Green Manure:

The varieties listed below have many uses in providing mulch, nitrogen fixation to the soil, organic matter which can be slashed or turned in and also providing a broad range of nutrients.

Legumes can be sown on their own or with existing vegetation. We recommend with low fertility soils that some type of nutrients be added initially in an organic form to help the green manure along. Grasses and grains can be grown on their own if fertility is good, thus providing bulk organic matter when slashed.

### **GREEN MANURE MIX**

**Organic**

A mix of seeds for specific seasons. This mix provides variety in your green manure. Specify season; Autumn/Winter - Buckwheat, Chickpea, Rye mix. Spring/Summer - Mungbean, Sunflower & Millet. 500gm will cover 30m<sup>2</sup>.

### Legumes:

#### **CHICKPEA** - (*Cicer arietinum*) - **Not to TAS** -

Annual legume to 60cm, excellent green manure. Seeds used whole, mashed, roasted, soups, thick paste, sprouts or flour. Sow Autumn - Winter. 1kg will cover 60m<sup>2</sup>.

#### **- White Garbenzo**

**Certified Organic**

Larger seed size and a white/cream colour. The skin is much thinner when it is used in cooking and a milder flavour. Ideal for microgreens.

#### **COWPEA - Edible Giant**

(*Vigna unguiculata*)

**Certified Organic**

Annual legume spreading to 1.5 metres, mauve flowers. Green pods eaten when young, plants can yield up to 1kg of black seeds. Used cooked as for pulses, soil improver. Sow Spring - Summer.

#### **FENUGREEK** (*Trigonella foenum-graecum*) **Certified Organic**

Annual legume to 60cm. A very diverse plant with it being a excellent green manure and forage plant. Seeds can also be ground and used as a spice, said to have medicinal uses and a excellent sprouting seed.

#### **LUPIN** (*Lupinus*) - **Not to TAS** -

**Organic**

Vigorous winter annual, white flowers, valuable green manure plant. Grows to 50cm tall. Good ground cover, border or mass display. Sow Autumn-Winter. 1kg will cover 50m<sup>2</sup>.

#### **MUNG BEAN** (*Vigna radiata*)

**Certified Organic**

Annual legume to 60cm. Sow Spring - Summer. Green plant used as green manure, seeds for sprouting, flour. Leaves and pods can be eaten fresh. 1kg will cover 60m<sup>2</sup>.

#### **PIGEON PEA** (*Cajanus cajan*)

**Organic**

2m legume shrub, yellow/red pea flowers. Young pods eaten green, seed cooked as dry beans/ground into flour. Animal forage, fodder, excellent soil improver, quick grower. Sow Spring - Autumn.

### Grains, Grasses & other:

#### **AMARANTH - Grain** (*Amaranthus hypochondriacus*) **Organic**

Fast growing annual to 1.2 metres high. Leaves eaten like spinach, white seeds high in protein. Use for cereal or popping. Sow Spring-Summer. 500gm covers 300m<sup>2</sup>.

#### **BARLEY** (*Hordeum vulgare*)

**Certified Organic**

Annual grain to 1 metre. Good green manure, very hardy. Sow Autumn to Winter. Sprout or cook the grain. Can be ground into flour. 1kg will cover 70m<sup>2</sup>.

#### **CHOOK FORAGE**

**Organic**

Grow a green crop for your chooks to forage amongst. Provides extra feed at leaf stage or allow to seed for grain heads that your chooks can feed on. 500gm will cover 40m<sup>2</sup>. Summer Mix contains Millet, Sunflower, Amaranth & Quinoa. Winter Mix contains Oats, Rye, Spinach & Pak Choy. Simply broadcast and keep moist.

# ORGANIC SEEDS IN LARGER QUANTITIES

Please note: All the bulk seed varieties are also available in standard seed packets.

## Seed Inoculant

For legumes to effectively make use of nitrogen in the atmosphere, they require the correct rhizobium bacteria. If you have never grown the legume variety in the soil you are using or not within the past two years, it's best to inoculate the seed. Information on how to apply the inoculant to seed is supplied.

**Specify which group required when ordering.**

**Group AL** - For Lucerne/Alfalfa, Stand & Disc Medics

**Group B** - For White & Red Clover

**Group C** - For Sub Clovers (Crimson, Subterranean etc)

**Group F** - For Faba Bean, Pea, Vetch and Lentils

**Group G** - For Lupin Narrow Leaf & Albus

**Group J** - For Pigeon Pea, Lab Lab, Hyacinth Bean

**Group I** - For Mung Bean, Cowpea, Moth Bean, Sun Hemp.

Pricing for all inoculant groups:

5g inoculant.....	\$4.50
25g inoculant .....	\$10.00
50g inoculant.....	\$16.00
100g inoculant.....	\$24.00

## Where are seeds grown?

We feel like this is mostly hidden in the Australian seed industry. We want to make it clearer where we get our seeds from, what labelling actually means and how you can be sure of your seed supplier.

Most of the heirloom seeds available for purchase online come from overseas. Why? Because it is more economical and easier to buy in seed and re-sell. This may come as a surprise, but most seed companies don't grow their seeds! We are part of the select few who actually grow our own seeds and sell direct to the customer. We grow roughly 240 varieties with a second farm starting to increase production that number will soon sky rocket. Look closely at where your seeds come from! A safer seed network starts with you saving your own heirloom seeds.

## Certifying Groups & Organisations for Organic & Bio-Dynamic Farming

**ACO - Australian Certified Organic**

- Certified Organically grown

PO Box 530, Chermide, QLD 4032

Ph: (07) 3350 5716

www.aco.net.au

**National Association for Sustainable**

**Agriculture (Aust) - Certified Organically grown**

PO Box 768, Stirling, SA 5152

Ph: (08) 8370 8455 www.nasaa.com.au

**Organically grown, uncertified.**

Uncertified organic farms that produce seed using sustainable organic methods.

**Southern Cross Certified**

**Cert No. 23007**

Certified organic seeds and plants.

Grown by greenpatch or sourced from other certified organic suppliers.

**LINSEED - Flax (*Linum usitatissimum*)** **Certified Organic**  
Annual to 90cm, upright habit, flowers blue-white. Ground seeds used in cereals, breads, fibre from stems, oil from seed. Excellent dietary addition. 500gm covers 200m<sup>2</sup>. Sow Autumn - Winter.

**MILLET - French White (*Panicum miliaceum*)** **Certified Organic**  
Annual to 1metre. Fast growing, good soil conditioner. Low water requirement. Sow Spring - Summer. 500gm covers 200m<sup>2</sup>.

**OATS (*Avena sativa*)** **Certified Organic**  
Annual to 1 metre, excellent green manure and forage crop. Nutritious edible grain and used for stock feed. Sow Autumn - Winter. 1kg will cover 70m<sup>2</sup>.

**RYE CORN (*Secale cereale*)** **Certified Organic**  
Very hardy annual to 1 metre. Cover crop and bulk green manure. Nutritious grain can be ground into flour. Sow Autumn - Winter. 1kg will cover 70m<sup>2</sup>.

**SUNFLOWER (*Helianthus annuus*)** **Certified Organic**  
Grow a mass effect for flower display. Useful green manure at leaf stage. Annual to 1.5 metres. Eaten as sprouts, seeds edible. Sow Spring - Summer. 1kg will cover 70m<sup>2</sup>.

**SPELT WHEAT (*Triticum spelta*)** **Certified Organic**  
Not for Sprouting. Hard wheat, soft textured grain, ground into flour, high protein.

**TRITICALE (*Triticale triticosecale*)** **Certified Organic**  
Annual grain, natural cross between wheat & rye. Grows to 1.5 metres, grain used for flour, cereals and baking. Good green manure & fodder plant. Sow Autumn - Winter. 1kg covers 50m<sup>2</sup>.

**WHEAT (*Triticum aestivum*)** **Certified Organic**  
Annual grain to 1m, useful forage crop, green manure, mulch provider, grain for stock feed, grain sprouted. Grown for wheat grass juice, ground for flour and also cooked. Sow Autumn - Winter. 1kg will cover 70m<sup>2</sup>.

## Garden Products

**Banana Bunch Covers** **\$3.50ea**  
Protect your banana crop from birds, flying foxes and helps to moderate temperature. The simple re-usable plastic cover is blue one side & silver the other side. Face blue side to sun during winter and silver side to sun during summer. Suitable for Cavendish and Lady Finger varieties. Size 1150mm x 720mm.

**Black Seedling Tray** **\$4.60 or 5 for \$16.00**  
Used to put soil in. 350x295x85mm. To raise seeds & seedlings.

**Coir Weed Mat Round 36cm** **\$4.00 ea or 5 for \$17.50**  
Suitable in all situations where weed suppression and water retention is important. They can be used in tree planting or in nursery pots. Made from the husk of the coconut and bound together with a natural latex they are biodegradable.

**Labels** **25 for \$4.00**  
Plain white, plastic push-in labels for all your seed sowing, planting & potting up. Ideal for keeping records & plant names. 125mm x 20mm in size.

**Neem Incense Sticks** **Pack of 12 - \$4.95**  
Use outdoors to deter various insects. Great when you want to relax. Lasts up to 30 minutes.

Please specify preferred scent; Lavender, Sandlewood or Rose geranium.

**Slasher Weed Killer** **1 litre - \$39.00**  
Slasher Weedkiller is a Registered Organic herbicide which rapidly kills weeds, moss, algae and lichen. It is a non-selective contact weed-killer. Use it in gardens, paths, driveways, around buildings and as a spot spray in lawns. It works quickly to easily control weeds the organic way! 5 litres makes 71 litres of spray.

**Soil P.H. Test Kit - Manutec** **\$32.00**  
A simple to use kit that can be used many times. Colour indicator dye & chart easily helps to find out P.H. level of your soil, and what it requires for improvement. Up to 100 tests.

**Weed Mat Black 100gsm 1.8m wide** **\$4.60/metre**  
High quality 100gsm weed mat is designed for horticultural use in gardens or areas of light foot traffic. It allows good water infiltration and prevents weeds from pushing through. Excellent for nursery use or home garden applications.

## Garden Tools

### Australian Made Hand Forged Tools

If you are sick of breaking tools that your local 'mega store' stocks then these tools are for you. They are made from a single piece of steel so there is no weak weld points and forged into shape by an experienced heirloom tool maker in Victoria. All tools are fitted with an Australian Hardwood handle.

**Handy Petersen Hoe** (pictured below left in image) **\$120**  
A light tool with roughly 70mm of cutting blade ideal for chipping in gardens, aerating around fruit trees etc. Handle length varieties with this product. Short handle is 65cm long and long handle is 105cm.

**Standard Petersen Hoe** (pictured above right in image) **\$150**  
A strong tool with roughly 95mm of cutting blade ideal for chipping in gardens, around fruit trees and heavier digging applications similar to that of a maddock. Tool is lightweight. Handle length is 105cm.

**Bush/Fern Hook** (pictured below) **\$175**  
The ideal tool for clearing scrub such as lantana, young saplings and all types of young re-growth using a slashing or reaping motion. Blade is approximately 25cm of cut surface. Fitted with a 90cm handle.

**Digging Bar** (pictured on right) **\$250**

A unique tool that is used instead of a crow bar. Far easier to handle and still as effective. Use when cleaning out post holes, de-barking logs, cutting roots etc. Sharp cutting blade is 100mm wide. The head of the tool has been shifted forwards to help with leverage and cleaning out the sides of post holes effectively. Handle length is 130cm long requiring a courier for delivery. Please contact us for an accurate freight quote.

## Organic Fertilisers

**Biocast+**

This liquid vermicast biostimulant extract is teeming with living microbes. A workforce for plant & soil health, immune booster, assists with transplanting and shock. Dilute with water and apply to the soil, plants. Makes up 105 litres of solution. **5litres - \$38.00**

**Eco Seaweed****ACO**

100% seaweed extract. Stimulates plant growth & minimises transplant shock. 100% soluble concentrated powder form. 100gm makes up to 200 litres of solution. **100gm - \$24.00; 600gm - \$38.00**

**Fish Emulsion****ACO**

Contains all nutrients of composted fish waste in liquid form. Suitable for use on all plants, with a balance of nutrients & trace elements. 1 litre makes 50 litres of fertiliser. **1 litre - \$27.00**

**Seafil Seaweed Concentrate****ACO**

Essential Biostimulant derived from concentrated fermented seaweed extract, containing minerals, amino acids and growth hormones. 1 litre makes 50 litres of fertiliser. **1 litre - \$27.00**

## Natural Pest Control

**Clear White Oil****500ml = \$19.00**

Oil based insecticide for control of scale, aphids, mealy bugs and mites on fruit trees & roses. Makes up to 20 litres.

**Eco Neem****ACO**

For the effective control of caterpillars, curlgrubs, grasshoppers (wingless), aphids, mites, lawn army worm, citrus leaf miner and white fly. Made from extracts of neem tree and other plant oils. Makes up 70 litres. **100ml - \$28.00; 250ml - \$49.00**

**Eco Oil****ACO**

For the control of two-spotted mites and aphids on ornamentals, vegetable and flower crops. 1 litre makes 200 litres of spray. **250ml = \$18.00; 1 Litre = \$34.00;**

**Eco NatraLure - Fruit Fly Bait****ACO**

Attracts and kills both male and female fruit fly, including the Queensland & Mediterranean fruit fly. Applied as a spot spray. 5 applications to ½ acre. **150ml = \$26.50; 1L = \$57.50**

**Fruit Fly Trap**

Plastic, durable trap. Suspend from fruit trees or posts. Easy to empty & refill. Use to fill with fly attractant. 4 traps per hectare. **\$12.00**

**Dipel Natures Way - contains *Bacillus thuringiensis*****ACO**

Effective control of leaf eating caterpillars on vegetables, flowers and fruiting plants. Safe to beneficial insects. Powder mixed with water. 10gm satchets **40gm pack makes up to 20 litres = \$26.00**

**Natra Soap****ACO**

Broad Spectrum Insecticidal soap in liquid form made from Potassium salts of fatty acids of vegetable oils. For control of soft bodied insects like aphids, whitefly, mites, leafhoppers, thrips, mealy bugs, scale. Blocks insects breathing holes, disrupts the nervous system, has suffocating affect. Will not harm people, birds, fish, bees, mammals, predatory insects. For use on fruit trees, vegetables, flowers. Biodegradable. 1 litre makes 100 litres of spray.

**1 litre = \$34.00****Pyrethrum - contains Piperonyl Butoxide**

An extract from the pyrethrum daisy effective on a wide range of insects including aphids, thrips, caterpillars and ants.

**100ml = \$15.80 (Makes up to 20 litres)****500ml = (Makes 166 litres) = \$29.00****Pyrethrum Insect Dust**

An extract from the pyrethrum daisy effective on a wide range of chewing and sucking insects. Suitable for use controlling ants or even interior of cupboards and drawers. **300g = \$14.50**

**Spray Tech Oil****ACO**

Wetting agent used with other pest control products. Improves spray performance, sticks to plants, reduces spray drift.

**500ml = \$24.00****Snail & Slug Killer - Protect Us****ACO**

Hardy perennial with a rosette of soft green leaves and attractive red veins, highly ornamental. Moist soil, sun-shade position, New leaves eaten only. Medicinal herb. Available all year. **\$5.80ea; 4 for \$22.00**

**SOUTHERN WOOD (*Artemisia abrotanum*)** **Certified Organic**  
Hardy perennial to 1.5 metres, shrub with finely cut leaves, sweetly aromatic. Medicinal properties, leaves used to discourage insects and moths. Attractive ornamental. Available all year. **\$5.80ea**

**SPEEDWELL (*Veronica officinalis*)** **Certified Organic**  
Perennial herb and ground cover. Lilac flowers in Summer. For moist shade to sun position, Many medicinal uses. Can be used as a tea. Available all year. **\$5.80ea**

**STINGING NETTLE (*Urtica dioica*)** **Certified Organic**  
Hardy perennial to 1 metre high. Rich in vitamins, minerals & iron. Leaves steamed and dried, makes an excellent liquid fertiliser. Available all year. **\$5.80ea; 4 for \$22.00**

**SUGAR CANE (*Saccharum officinalis*)** **Certified Organic**  
Very hardy, fast growing, tolerates warm-temperate areas. Used as low wind break. Forms clump to 4m, stems sliced, chew to extract sweet juice. Kids love em! (*Not to Qld.*) **\$9.00ea**

**SUGARCANE-Purple(*Saccharum officinalis*)** **Certified Organic**  
Hardy, tolerates warm-temperate areas, attractive ornamental garden specimen. Grows in clump form to 4m, producing bronze-purple foliage, stems sliced, chew to extract sweet juice. (*Not to Qld.*) **\$9.00ea**

**SWEET LEAF (*Stevia rebaudiana*)** **Certified Organic**  
Perennial to 60cm high. Dried leaves 30 times sweeter than sucrose. Use fresh or dry as sugar substitute. Hardy for most areas, dormant in winter. Avail. all year. **\$6.50ea; 4 for \$22.00**

**SWEET POTATO - Beauregard** **Certified Organic**  
(*Ipomea batatas*) Popular variety, orange flesh, sweet flavour. For warm climates, produced through Summer/Autumn. **\$6.50ea**

**SWEET POTATO - Hawaiian (*I. batatas*)** **Certified Organic**  
Cream coloured tubers with mauve centres and green dissected leaves. Excellent flavour. Avail. all year. **\$6.50ea**

**SWEET POTATO - Kumara (*I. batatas*)** **Certified Organic**  
Origin Polynesia, heirloom variety found through New Zealand. Purple/mauve skin with white flesh, marbled with mauve. Creamy flavour, baked or mashed. Tubers large. **\$6.50ea**

**SWEET POTATO - Purple (*Ipomea batatas*)** **Certified Organic**  
Suited good, well drained soil, sunny position, producing delicious purple skinned tubers & white flesh. High in anthocyanin. Available all year. **\$6.50ea**

**SWEET POTATO - White (*Ipomea batatas*)** **Certified Organic**  
Perennial trailing tuber, developing over summer. White oval flesh, harvest 4-6 months after planting. Plant Spring-early Summer in cooler climates, all year in tropics. Steam, bake, fry or dry tubers. Available all year. **\$6.50ea**

**SWEET ROOT - Yacon** **Certified Organic**  
(*Polymnia sonchifolia*) Herbaceous perennial to 2m. Suits most climates, dies down in winter. Tubers sweet, white and crunchy. Eat fresh, sliced in salad, baked/steamed. Available June - December as dormant tuber. **\$9.00ea**

**SWEET VIOLET (*Viola odorata*)** **Certified Organic**  
Old World plant, hardy perennial to 30cm attractive, edible blue perfume flowers. Likes moist soil, sun to shade position. Medicinal properties. Available all year. **\$5.80ea; 4 for \$22.00**

**TANSY (*Tanacetum vulgare*)** **Certified Organic**  
Hardy perennial to 1.2metres, tolerates dryness and poorer soils. Shrubby plant with dissected leaves and showy yellow flower heads. Repels moths, ants, aphids, flies. Treatment for roundworms, rich in minerals for composting. **\$5.80ea; 4 for \$22.00**

**TANSY - Curled (*Tanacetum vulgare*)** **Certified Organic**  
Hardy perennial to 1 metre, very attractive curly foliage. Similar uses to common tansy. Available all year. **\$5.80ea**

**TARRAGON-French (*Artemisiadracunculus*)** **Certified Organic**  
Perennial herb to 50cm. Aromatic small leaves with a mint anise flavour. Used in cooking, bottled vinegars. **\$6.50ea**

**TARRAGON - Winter (*Tagetes lucida*)** **Certified Organic**  
Hardy perennial herb, with decorative yellow flowers in Summer. Aromatic licorice flavoured leaves, use fresh or dried in salads, egg, fish dishes, herbal tea. Avail all year. **\$5.80ea; 4 for \$22.00**

**TARO**  
Perennial for moist or wet conditions. Tubers are eaten cooked. Part shade position. Available all year.

- **Golden** **Certified Organic**  
Large leaves attractive golden colour. Highly decorative landscape plant. **\$12.00ea**

- **Japanese** **Certified Organic**  
(*Colocasia esculenta antiquorum*) More compact growth producing smaller tubers. Delicious potato substitute, green leaves & redish stalks. **\$12.00ea**

- **Pacific (*Colocasia esculenta*)** **Certified Organic**  
Very ornamental. Leaves are nutritious cooked, can be used to wrap food in. Tubers eaten cooked. **\$12.00ea**

**THYME - Carraway (*Thymus herba-barona*)** **Certified Organic**  
Low growing carpet, minute dark green leaves strong caraway aroma. Low water requirement, frost hardy, mauve flowers in Summer. Leaves flavour meat, vegetables. **\$5.80ea; 4 for \$22.00**

**THYME - Common (*Thymus vulgaris*)** **Certified Organic**  
Evergreen culinary herb to 30cm high. For well drained, sunny position. Frost hardy. Used in a variety of cooked dishes. Available all year. **\$5.80ea; 4 for \$22.00**

**THYME - Lemon (*Thymus citriodorus*)** **Certified Organic**  
Compact small perennial bush to 30cm high, small green ovate leaves, strongly lemon scented. Used to flavour culinary dishes. Available all year. **\$5.80ea; 4 for \$22.00**

**THYME - Orange (*Thymus nitidus*)** **Certified Organic**  
Hardy compact perennial ground cover to 5cm high. Forming a carpet of green, aromatic leaves smelling of orange peel. Low water requirement, full sun, frost hardy. **\$6.50; 4 for \$22.00**

**THYME - Pizza (*Thymus numularis*)** **Certified Organic**  
Prostrate growing variety to 15cm high, highly aromatic leaves used in culinary dishes. Attractive ground cover. **\$5.80ea; 4 for \$22.00**

**THYME - Silver Posy (*Thymus vulgaris 'Argenteus'*)** **Certified Organic**  
Compact perennial to 25cm. Attractive variegated silver & green leaves, small pink flowers in Summer. Ideal pot or rockery plant. Use as common thyme. **\$6.50ea**

**THYME - Turkey (*Thymus pulegioides*)** **Certified Organic**  
Hardy & sun loving, for well drained soil, to 20cm high, strongly fragrant. One of the best tasting for cooking. **\$6.50ea**

**TOOTHACHE PLANT (*Spilanthies acmelia*)** **Certified Organic**  
Small compact perennial with yellow button flowers. Suited to a partly shady position. Leaves and buds chewed to numb a toothache. **\$5.80ea**

**TREE ONION/EGYPTIAN** **Certified Organic**  
(*Allium cepa - proliferum*) Perennial to 60cm, producing multiplying bulbs to 4cm across with brown skin. Small bulblets are produced on the flower heads which repropagate. Cold hardy plant. Use as for onions. **1 bulb/Pot \$5.80**

Native rainforest tree, large glossy leaves, bronze new growth. Hardy when established, good specimen tree to 15m, ideal for regeneration work. Cream flowers attract bees followed by edible margenta fruit eaten fresh, preserves, jam. **\$5.00ea; 4 for \$18.00**

**LOGANBERRY - Thornless Certified Organic**

(*Rubus loganobaccus*) Fruit, cylindrical purple-black when ripe, sweetens when fully mature. Cross between raspberry & blackberry, thorny. Train on wires. **\$18.00ea**

**LOQUAT (*Eriobotrya japonica*) Certified Organic**

Fast growing & small tree with attractive green leaves. Clusters of orange fruit fruit, sweet & juicy. Hardy for temperate to tropical climates. Bears in 4-5 years. **\$12.00ea**

**MANDARIN - Thorny (*Citrus nobilis*) Certified Organic**

Very hardy selected seedling, to 4m, excellent crop mandarins 6 years after planting. Fruit-size medium to large, loose skin, easy peeling, excellent eating, sweet, juicy, some seeds. Fruit matures late Winter. Drought tolerant, strong grower with some thorns. Available all year. **\$12.00ea**

**MULBERRY - Black (*Morus nigra*) Certified Organic**

Large shrub to 7 metres high, bushy habit with arching branches, prolific bearer. This strain produces good sized black fruit. Bears after 1 year. Deciduous & cold hardy. **\$18.00ea**

**PASSIONFRUIT - Banana Certified Organic**

(*Passiflora mollissima*) Evergreen vine, producing very attractive large, pink flowers, fruit yellow skinned, 7 cm long with sweet pulp. Suited to cooler areas, dislikes hot conditions. Available all year. **\$7.00ea; 4 for \$24.00**

**PASSIONFRUIT - Black (*Passiflora edulis*) Certified Organic**

Vigorous evergreen vine producing large black fruit Summer - Autumn. Juice sweet with orange flesh. Provide support to climb on. Bears fruit in 18 months. Available all year. **\$7.00ea; 4 for \$24.00**

**PASSIONFRUIT - Panama Gold Certified Organic**

(*Passiflora edulis*) Vigorous grower for warmer areas. Yellow skin, delicious fruit. Available all year. **\$7.00ea; 4 for \$24.00**

**PASSIONFRUIT - Panama Red Certified Organic**

(*Passiflora edulis*) Vigorous grower, large fruit with redish skin, heavy cropper from Autumn-Spring. For warmer areas. Available all year. **\$7.00ea; 4 for \$24.00**

**PASSIONFRUIT - Yellow Certified Organic**

(*Passiflora flavicarpa*) Medium sized, yellow skinned, sweet with strong flavour. Vigorous climber for warmer areas. **\$7.00ea; 4 for \$24.00**

**PAW PAW - Red (*Papaya carica*) Certified Organic**

Tropical fruiting plant growing to 2m tall. Both male and female flowers on the one plant. Likes warmer climates or position against a north facing wall for maximum warmth in cooler climates. Produces large globe shaped fruit with red flesh. Paw paw's to 1kg with a sweet juicy taste. Use fruits green for asian salads or allow to ripen as an excellent tropical fruit. **\$12.00**

**PEACH - Dwarf (*Prunus persica*) Certified Organic**

Heavy cropper of medium sized green peaches with light red blush ready in late Dec-Jan. Perfect for preserving or eaten fresh. 1.5m tall. Space 1.5m apart. Easily covered with netting. **\$18.00**

**PEPINO (*Solanum muricatum*) Certified Organic**

Perennial to 50 cm fast growing, producing oval shaped fruit to 10 cm, pale yellow sweet edible flesh, with mild rockmelon flavour. Adds flavour to fruit salads. Grow as annual in frosty areas. Available all year. **\$7.00ea**

**PLUM PINE (*Podocarpus elatus*) Certified Organic**

Native rainforest pine tree with dark green leaves, ideal as a hedge or specimen. Purple fruit grape like, sweet plum like flavour. Male and female on seperate plants. Plant 3 for best chance of fruiting. **\$12.00ea; 3 for \$30.00**

**RASPBERRY - Heritage (*Rubus idaeus*) Certified Organic**

Popular fruiting berry, low chill variety, self pollinating. Does not require cold Winters, producing good quality red fruit in Summer. Train as perennial vine in part shade position. **\$12.00ea**

**STRAWBERRY - Alpine Alibaba Certified Organic**

(*Fragaria vesca*) Small red fruiting alpine strawberry, intense flavour. Compact plant to 15cm, runnerless, good garden or pot plant. Produces for most of the year. Available all year. **\$5.80ea; 4 for \$22.00**

**STRAWBERRY - Temptation Certified Organic**

(*Fragaria ananassa*) Perennial plant to 25cm, almost runnerless. Ideal for pots or garden. Produces medium red fruits, for sunny position. Available all year. **\$5.80ea; 4 for \$22.00**

**STRAWBERRY - White Soul Certified Organic**

(*Fragaria ananassa*) Hardy alpine heirloom to 15cm, producing sweet creamy-white aromatic fruit to 2.5cm long. Less prone to bird attack due to fruit colour. **\$5.80ea; 4 for \$22.00**

**TAMARILLO (*Cyphomandra betacea*) Certified Organic**

Fast growing tree to 2.5 metres high. Bunches of red fruit after 18 months. Fruit ripens in Autumn. Eaten fresh or in jams & jellies. Available all year. **\$7.00ea**

**►YOUNG BERRY (*Rubus ursinus*) Certified Organic**

Vigorous growing vine with trailing thornless canes. Berries can be eaten straight off the bush or used in jams, cooking etc. Early fruiting before blackberry. Good disease resistance. Hardy grower, handling dry conditions. Avoid watering fruits when ripening. **\$18ea**

## Cottage Garden

*Due to low demand our cottage garden range has been discontinued. We will only be continuing our Pigface, Easy Daisy Range and select few flowering perennials.*

**CROCUS - Pink (*Habranthus robustus*) Certified Organic**

Attractive bulbous plant to 30cm high, clump forming with bright pink single flowers, 7cm across, flowering in Summer. Available all year. **\$6.50ea**

**CROCUS - White (*Zephyranthes candida*) Certified Organic**

Low growing bulbous plant to 30 cm, producing showy white flowers in Autumn 5cm across. Sun to part shade, multiplies readily. Useful in pots, rockeries or border edges. Available all year. **\$6.50ea**

**CROCUS - Yellow (*Zephyranthes citrinus*) Certified Organic**

Compact perennial, clump forming to 20cm high, single yellow flowers 5cm across in Summer-Autumn. Ideal in pots, rockeries or border plant. Available all year. **\$6.50ea**

**DELOSPERMA (*Delosperma cooperi*) Certified Organic**

Attractive mat forming perennial with small green succulent like leaves. Flowers spring to summer with a sea of small purple flowers. Sun loving, low water requirements, plant in pot or garden **\$6.50ea**

**EASTER DAISY**

Hardy, clump forming perennials for sunny position. Plant in good well drained soil, frost hardy. Profuse flowering late Summer to Autumn. Available all year. **\$6.50ea**

**- Blue (*Aster nova-belgeii*) Certified Organic**

Tall grower to 80cm, attractive sky blue flowers with yellow centre. Flowering in Autumn.

**- Deep Pink (*Aster nova-belgeii*) Certified Organic**

Compact variety to 45cm with bright, single pink flowers in Autumn.

**- Double Pink (*Aster nova-belgeii*) Certified Organic**

Compact variety to 60cm with bright, double pink flowers in Autumn.

**- Dwarf Blue (*Amellus*) Certified Organic**

Perennial to 40cm. Good for border, bedding or pot. Compact bush, semi double blue flowers 3cm across.

**- Dwarf White (*Amellus*) Certified Organic**

Perennial to 40cm. Good for border, bedding or pot. Semi double white flowers.

**- Mauve (*Aster nova-belgeii*) Certified Organic**

Bushy habit to 60cm high. Mauve flowers with a yellow centre.

**- White Cascade (*Aster nova-belgeii*) Certified Organic**

Tall variety with white starry flowers height 90cms.

**PIGFACE (*Lampranthus*) Certified Organic**

Spectacular flowering perennials. Ideal for small spaces, rockeries, pots. Hardy sun loving, for well drained soil. Low water needs. Tolerates mild frost. Available all year. **All \$6.50ea**

**Red -** Spectacular red flowers mid Spring  
**Crimson -** Spreading plant, height to 30cm. Flowers 5cm across.

**Large -** Compact grower to 30cm, thick green  
**Pink** leaves, large pink flowers to 6cm across.

**Large White -** Large white flowers in Spring.

**Upright Mauve -** Large mauve flowers to 6cm in Spring. Height 60cm.

**Orange -** Vivid 6cm orange flowers in early Spring.  
**Purple -** brilliant purple flowers to 5cm across. The earliest flowering variety from May-September.

Bushy habit to 50cm high.

**Prostrate Mauve -** Soft mauve flowers, early Spring.

**Yellow -** Compact habit. 5cm yellow flowers in Spring.

**Gold -** Bright gold flowers 5cm across in early Spring.

**Bright Pink -** Bushy plant 45cm wide, 30cm high, 5cm pink flowers in Spring.

**(*Mesembryanthemum* Compact trailing plant for rockeries to 60cm wide with *crystallinum*) masses of small mauve flowers.**

**SALVIA - Bethel Sage Certified Organic**

**(*Salvia involucrata bethellii*)** Stunning cottage perennial, shrubby like habit growing to 1.2 metres. Attractive heart shaped lime green leaves & large pink tubular flowers in Autumn. Frost free. **\$6.50ea; 4 for \$22.00**

**SALVIA - Hot Lips (*Salvia microphylla*) Certified Organic**

Bushy attractive perennial shrub to 80cm high. Flowers are delicately two toned red and white that flower for most of the year. **\$6.50ea; 4 for \$22.00**

# Greenpatch Seed Range

*Untreated, Non-Hybrid, Open Pollinated*

## Vegetables

**ALL VARIETIES LISTED BELOW CAN BE PURCHASED AS SEED PACKETS OR BULK SEED AS LISTED**

**Packets - \$3.50 each. Members \$3.15 each.**

**AMARANTH (*Amaranthus mangostanus*)**

**- Edible Green Leaf 5gm - \$15**

Growing to 80cm, produces large tender leaves. Use as for spinach and stir fries. Harvest at 30days. Sow Spring-Summer.

**ARTICHOKE - Purple Headed (*Cynara scolymus*)**

Grows to 1.5 metres, a prized delicacy, used steamed, in casseroles & preserves. Rounded heads purple-green colour, producing large hearts for eating. Grow in rich well drained moist soil. Sow Autumn-Spring

**ASPARAGUS - Argenteuil (*Asparagus officinalis*)**

Attractive French heirloom perennial, 2cm thick white green spears with purple tinted tip. Sow Spring-Autumn. **5g - \$14**

**ASPARAGUS - Mary Washington (*Asparagus officinalis*)**

Perennial to 2 metres, old variety, robust spears, used commercially. Start harvesting after 2 years. Sow Spring - Autumn. **5g - \$14**

**ASPARAGUS PEA (*Tetragonolobus purpureus*)**

Annual legume producing winged pods that taste similar to peas & asparagus. It is best eaten blanched or saute with butter. Grows in average soil types as a rambling bush. Sow Spring-Autumn.

**BEAN - BUSH (*Phaseolus vulgaris*)**

High yielding and rich in protein. Plant every 3 weeks for continuous supply. Sow Spring-Summer.

**Borlotti Red Rooster 500gm - \$18; 1kg - \$34**

Compact variety producing attractive flat red pods with cream markings/flecks. Seed is rounded, light brown with red markings. Pods can be eaten when young and tender or picked at the mature stage for use as a dry bean in cooked dishes and soups.

**- Cherokee Wax 500gm - \$20; 1kg - \$38**

Compact variety producing yellow stringless pods. Adds attractive colour to salads. Eat fresh or cooked.

**- Redland Pioneer 500gm - \$20; 1kg - \$38**

Long flat stringless pods of good quality, old variety.

**- Royal Burgandy 500gm - \$20; 1kg - \$38**

Compact, producing purple pods that are stringless when young. Adds colour to salads.

**- Provider 500gm - \$22; 1kg - \$38**

Compact variety, pods up to 15cm. Round, green stringless.

**- Windsor Long Pod 500gm - \$20; 1kg - \$38**

Popular, pods flat 20cm long. Stringless when picked early. Seeds red.

**BEAN - CLIMBING (*Phaseolus vulgaris*)**

Take up little room and yield over a long period, provide trellis. Sow Spring-Summer.

**- Blue Lake 500gm - \$20; 1kg - \$38**

Popular old variety, climber to 2 metres, heavy bearer of fleshy, round, green, stringless pods to 15cm long.

**- Purple King 500gm - \$18; 1kg - \$34**

Flat purple pod to 18cm popular variety. Pods turn green when cooked. Adds colour and flavour to salads.

**BEETROOT (*Beta vulgaris*)**

Popular root vegetable. Fast growing, bi-annual, easy to grow. Sow direct in garden. 60 days to maturity. Keep moist in fertile well drained soil, sunny position. Use in salads, soups, cooked or preserved. Sow all year except in very hot weather.

**- Burpee's Golden**

Sweet golden flesh, milder flavour, green tops used like spinach. Used in salads, cooked & steamed.

**- Chioggia 25gm - \$15; 50gm - \$28; 100gm - \$45**

Also known as Candy Stripe. Attractive red skinned beetroot with red & white rings. Sweet tasting flavour.

- **Cylindra** 25gm - \$15; 50gm - \$28  
Cylindrical variety, smooth dark red roots up to 20cm long. Tender with sweet flavour.
- **Detroit** 25gm - \$10; 50gm - \$18; 100gm - \$28  
Round red roots up to 12cm across. Smooth tender, sweet

### **BROAD BEAN** (*Vicia faba*)

Eaten fresh or cooked. Sow Autumn - Spring.

- **Coles Dwarf Prolific** 250g-\$6; 500gm-\$10; 1kg-\$18; 5kg-\$69  
Compact grower to 1 metre, good cropper with 20cm pods.
- **Long Pod** 250gm - \$6; 500gm - \$10; 1kg - \$18; 5kg - \$69  
Hardy vegetable, annual to 1.5 metres high, producing large sized pods.

### **BROCCOLI** (*Brassica oleracea*)

Rich in calcium, vitamins and minerals. Sow all year, except hot weather.

- **Calabrese** 25gm - \$12; 50gm - \$19; 100gm - \$28  
Good producer of medium sized heads & continues to produce side shoots.
- **Romanesco** 5gm - \$12; 25gm - \$24  
Produces pale green heads in a whirled pattern. 20-30cm across, good flavour. 100 days to maturity. Prefers cooler conditions.

### **BRUSSEL SPROUTS - Long Island** (*Brassica oleracea*)

Popular traditional variety. Excellent sweet green sprouts. 3-4 months to maturity. Sow Autumn-Winter. 5gm - \$12; 25gm - \$24;

### **BURDOCK** (*Arctium lappa*)

Hardy root vegetable to 1 metre high with large leaves. Young roots eaten raw, older ones steamed or cooked in soups. Sow Autumn-Spring, in fertile garden soil. 5gm - \$14

### **CABBAGE** (*Brassica oleracea*)

Popular vegetable, high in calcium & iron. Like fertile, well drained soil, sunny position. Frost hardy. Sow in containers & transplant to garden. Sow all year, except in hot conditions.

- **Conehead** 25gm - \$12; 50gm - \$19  
An old heirloom variety, rare. Small conical shaped head similar to Cabbage Sugarloaf. Sweet flavour, excellent texture. Heads up to 1-1.2kg. Excellent in salads. 90 days to maturity. Popular vegetable, high in calcium & iron. Likes sunny position. Frost hardy. Sow all year except in hot conditions, ideal in containers or direct to garden.
- **Golden Acre** 5gm - \$12; 25gm - \$25; 50gm - \$46  
Early producing variety forming small, round, light green heads to 1.5kg. 80 days to maturity.
- **Red** 5gm - \$10; 25gm - \$17  
Globe shaped, red cabbage to 20cm diameter. Heads up to 2kg. Use raw or cooked.
- **Savoy Verona purple** 5gm-\$10; 25gm-\$17; 50gm-\$28  
Large European cabbage, purple colour, enhanced by Winter temperatures, producing a 3-4kg head in 90 days, stores well.
- **Savoy Vertus** 5gm - \$11; 25gm - \$19; 50gm - \$33  
Produces 20cm savoy green crinkly leaved cabbage. Mild flavour for salads & coleslaws.
- **Sugar Loaf** 5gm - \$11; 25gm - \$19  
Very old variety, small conical shaped heads, sweet flavour. Excellent in salads. 80 days to maturity.

- **Wong Bok** 5gm - \$9; 25gm - \$13; 50gm - \$24  
Popular variety of cabbage used in salads and making Kimchi. It is a tall upright variety producing a cylindrical head to 25cm tall. Dark green leaves and well blanched interior.

### **CAPSICUM** (*Capsicum annuum*)

Popular Summer vegetable, high yielding, shrubby plants for warm sunny position. Yield over a long period. Sow Spring - Summer

- **Bogyiszlo**  
Heirloom variety from Hungary. Hardy to 45cm high, fruit yellow, ripening to red. 8cm across tapering to a point, producing an abundant crop. 5gm - \$12; 25gm - \$24
- **Californian Wonder**  
Sweet fruit, cube shaped 10 cm, bell type, heavy producer use green or red, high in Vitamin C.

### **Hungarian Sweet Paprika**

Traditional Hungarian variety that is revered for its authentic paprika flavoured chilli's. This variety is ideal for drying and grinding into powder. Plant in good, well drained soil in sunny position. 5gm - \$12; 25gm - \$24

### **CARROT** (*Daucus carota*)

Popular root vegetable. Sow direct in garden. Thin out at 5cm high. Keep moist in fertile well drained, sunny position. Use fresh in salads, soups, juices or cooked. Sow all year

- **All Seasons** 5gm - \$9; 25gm - \$13; 50gm - \$24; 100gm - \$40  
Hardy variety to 20cm long suited to warmer climates or for Summer conditions. Orange skin, orange/red core.
- **Atomic Red**  
High in lycopene, red roots to 25cm long. Adds much colour to dishes. Holds colour when cooked.
- **Baby** 25gm - \$15; 50gm - \$26; 100gm - \$50  
Ideal variety for shallow soils, harvest as baby carrots. Orange root to 14cm, quick to mature.
- **Scarlet Nantes** 5gm - \$10; 25gm - \$17; 50gm - \$29; 100gm - \$51  
Bright orange-red root to 18cm, coreless variety. Very sweet flavour. Good for juicing and baby carrots.
- **Solar Yellow**  
Early maturing variety - 65 days. Yellow carrot to 18cm long, sweet and crunchy flavour.

### **CAULIFLOWER** (*Brassica oleracea*)

Popular Winter vegetable, used in cooked food. Plant in cooler months in fertile, well drained soil, sunny position. Keep moist. Sow Autumn-Spring.

- **Snowball** 5gm - \$12; 25gm - \$29; 50gm - \$46  
Crisp, tender white heads to 16cm across. Good quality suited to warmer areas. 90 days to maturity.
- **Purple Sicily**  
Attractive purple heads to 1kg. 180 days to maturity.

### **CELERIAC - White Alabaster** (*Apium graveolens rapaceum*)

Hardy root vegetable related to celery. Grate root to add flavour to salads, soups & many cooked dishes. Use tops as for celery. Sow Autumn-Spring. 5gm - \$13

### **CHICORY** (*Cichorium intybus*)

Popular Winter vegetable, used in cooked food. Plant in cooler months in fertile, well drained soil, sunny position. Keep moist. Sow Autumn-Spring.

- **Palla Rossa** 5gm - \$13  
Dark green outer leaves, with a 10-15cm red wine coloured head and white ribs. Attractive variety, bitter taste. Use in Italian dishes, salads, steamed and boiled.
- **Punter** 5gm - \$13  
Deep rooted perennial herb with excellent winter growth and high in minerals. A great addition to pasture mixes to increase plant diversity for grazing animals. Ideal for ruminants and poultry. Sow during Autumn to Spring.
- **Witloof** 5gm - \$13  
Hardy bi-annual with penetrating white taproot. Green leaves used in salads or cooking. Roots can be blanched and used in food dishes. Also roots dried and roasted for coffee substitute. Sow Autumn-Spring.

### **COLLARD - Georgia Southern** (*Brassica oleracea*)

Hardy vegetable that produces large light soft green leaves over a long period. Sweet flavour use fresh or lightly steamed. High in vitamins and minerals. Sow Autumn-Spring.

### **CORN SALAD** (*Valerianella locusta*)

Compact annual to 20cm high. For cool conditions & moist soil. Also know as Lambs Lettuce. Used in salads & cooked like spinach. Sow Autumn-Winter. 5gm \$12

### **CUCUMBER - Richmond Green Apple** (*Cucumis sativus*)

Spreading annual vine producing rounded shaped fruit to 10cm, heavy bearing variety. Cream to green skin with sweet tasting oval fruit, very crisp. Likes well drained soil in sunny position. Sow Spring - Summer. 25gm \$18; 50gm \$31; 100gm \$52

**EGGPLANT (*Solanum melongena*)**

Decorative annuals, attractive leaves and flowers. Fruit used in cooking. Sow Spring-Summer.

- **Black Beauty** 5gm - \$14  
Large oval black fruit, 80 days to maturity.
- **Long Purple** 5gm - \$14  
Popular old variety, producing long, dark fruit to 25cm long & 8cm wide.
- **Tsakoniki** 5gm - \$15  
Bushy plant to 70cm high. Fruit purple with white stripes, cylindrical up to 25cm long.

**ENDIVE - Salad King (*Cichorium endiva*)**

Large open growth, attractive serrated curly leaves, winter hardy. Use in salads and blanched. Sow Autumn-Spring.

5gm \$12; 25gm \$28

**KOHLRABI - Purple Vienna (*Brassica oleracea Gongylodes*)**

Fast growing vegetable, bulb & stem are purple. Sweet flesh is white, excellent in stir fries or steamed. Best started early autumn for best flavour. Sow Autumn - Spring.

5gm - \$9; 25gm - \$13

**KALE (*Brassica oleracea*)**

Nutritious leafy green, eaten fresh or steamed. High in vitamins & minerals, pick leaves as required. Plant in good well drained soil, sunny position, keep moist. Sow Autumn-Spring.

- **Black Toscana**  
Also known as Lacinato. Produces long dark green leaves, formed from the middle of the plant. Highly nutritious. Sweet flavour. 5g - \$12; 25gm \$24; 50gm \$33
- **Dwarf Blue Curled**  
Compact variety with curly, blueish-green leaves. Attractive specimen. 5g - \$12; 25gm - \$22; 50gm - \$31
- **Red Russian** (*Brassica fimbriata*)  
Leaves blue-green with purplish red veins. Sweet flavour, eaten fresh when young or steamed. Highly nutritious. Hardy to grow. 25gm - \$10; 50gm - \$16; 100gm - \$29

**LEEK - Bulgarian Giant (*Allium ampeloprasum porrum*)**

Good sized, early maturing variety, with light green leaves & long cylindrical stem. Likes deep, fertile, moist soil. Great steamed, baked, fried for garnish, boiled, blends well with other vegetables. Adds flavour to soups & quiches. Sow Autumn - Spring.

5gm - \$11; 25gm - \$19; 50gm - \$32

**LETTUCE (*Lactuca sativa*)**

Hearting and Loose leaf types, decorative colours and shapes. For Cool/Cold climates sow Spring-Autumn. All other climates sow Autumn-Spring. Varieties available for all seasons, plant in rich well drained soil, sunny moist position.

- **Cos Parris Island**  
Soft green cos variety with pale cream inside, semi hearting. Ideal to pick as baby leaf, excellent flavour & texture for salad mix. 5gm - \$9; 25gm - \$22
- **Great Lakes**  
Iceberg type, crisp green heads & firm hearts. 12 weeks to maturity. 5gm - \$12; 25gm - \$29
- **Red Salad Bowl**  
Decorative variety for salad or as a garnish. Leaves are bronze/red, dissected and wavy. Harvest as a side pick variety as required. 5gm - \$12; 25gm - \$29

**MITSUBA (*Chryptotaenia japonica*)**

Japanese salad green, high aromatic flavour, parsley like. Leaves used fresh or in soups and stews. Sow Autumn - Spring.

**MIZUNA - Red Coral (*Brassica juncea*)**

Fast growing winter vegetable to 60cm. Light mustard flavoured ruby red dissected leaves eaten fresh in salads. Loses it's heat when cooked. Likes good well drained soil in a sunny position. Sow All Year.

**MUSTARD - White/Yellow** (*Brassica juncea alba*)  
Grown as an annual, seeds used as a condiment or green manure crop, dig in soil to deter nematodes. Sow Autumn - Spring. 100g cover 30m<sup>2</sup> 100gm - \$12; 500gm - \$32

**ONION (*Allium cepa*)**

Likes good well drained soil, sunny position, 140-180 days to maturity. Harvest when stems are yellow. Sow Autumn-Winter.

- **Gladalan Brown** 5gm \$14; 25gm \$32; 50gm \$46  
Popular old variety, good sized, brown skinned onion, medium short day. Use fresh or cooked.
- **Early White Spanish** 5gm \$9; 25gm \$15  
Popular and delicious variety, forming sweet, round white fleshed onions. Early maturing variety known for their uniformity and hard bulbs. Excellent storing life.
- **Long Tropea Red**  
Excellent salad onion producing medium sized, elongated red onions, medium day length. Early maturing variety
- **Pukekhe Longkeeper** 5gm \$12; 25gm \$29; 50gm \$46  
Excellent storing, brown skinned onion, resists bolting, long day length. New Zealand variety.
- **White Lisbon Spring Onion** 5gm \$14; 25gm \$29  
Bunching variety producing smaller bulbs, ideal for pickling or spring onion. Long, clear white skins & green tops. Mild flavour.

**PEA - Not to TAS-**

(*Pisum sativum*)

Sweet and tasty winter vegetable, eat fresh or dried. Sow Autumn - Spring.

- **Greenfeast** 100gm - \$5; 500gm - \$9; 1kg - \$16  
Very popular, early, bush variety, heavy crops of fine flavoured peas when young. Harvest peas when pod has rounded.
- **Massey Gem** 100gm - \$5; 500gm - \$9; 1kg - \$16  
Compact bush variety, disease resistant, abundant crop. Eat fresh and suitable for freezing. Delicious flavour.
- **Oregon Sugar Pod** 100gm - \$7; 500gm - \$18; 1kg - \$32  
Strong growing bush variety to 80cm. Bears good crop of sweet, flat pods. Eat fresh. Powdery mildew resistant.
- **Snow Pea - Melting Mammoth**  
Strong climber to 2 metres, heavy cropper, sweet pods eaten when young and flat - eat fresh or cooked. 100gm - \$7; 500gm - \$18; 1kg - \$32

**Snow Pea - Yakumo**

Climber to 2 metres, large flat sweet pods to 13cm long, purple flowers. 100gm - \$10; 500gm - \$24; 1kg - \$45

- **Sugar Snap Bon**  
Sweet edible green pods, bushy type, prolific bearer. Pick when pods have filled out. 100gm - \$9; 500gm - \$19; 1kg - \$35
- **Telephone Pea**  
Vigorous climber to 2 metres. Large pods over a long period. Excellent shelling pea. 100gm - \$5; 500gm - \$9; 1kg - \$16

**PEANUT (*Arachis hypCertified Organicea*)**

Easy to grow, plant after frosts. Needs 5 months of warm weather. Plant in rows, yellow flowers lodge into soil to form peanuts. Low bushy plant to 40cm high, harvest in late Summer-Autumn.

100gm - \$8; 250gm - \$16

**PUMPKIN**

Annual bushes or vines easily grown in good well drained soil. Used in soups, pies and baking. Sow Spring and Summer.

- **Atlantic Giant (*Cucurbita maxima*)**  
Super large show pumpkin, pinkish-orange skin, stock feed. Can grow to 100kg or more.
- **Waltham Butternut (*Cucurbita mochata*)**  
Pear-shaped fruit to 2kg with light orange skin. Small seed cavity at one end. Orange coloured flesh that has an excellent flavour. 25gm - \$13; 50gm - \$24

**RADISH**

(*Raphanus sativus*)

Fast germinating, root vegetable, eaten fresh in salads or steamed. Maturity in 3-4 weeks. Likes fertile, moist soil in full sun. Sow Autumn - Spring

**►Champion**

Round red roots to 4cm across with crisp white flesh. 30-40 days to maturity. 25g - \$14

- **Cherry Belle**  
Smooth round red root to 4cm across. White mild flesh. 30-40 days to maturity.

### - French Breakfast

Scarlet roots with white rounded tip to 8cm, mild flavour.

### **RHUBARB - Victoria** (*Rheum rhabarbarum*)

Produces broad stalks green-red colour, up to 60cm long. Vigorous upright grower. Sow Spring-Autumn.

### **SHALLOTS - Evergreen Bunching Nebuka**

(*Allium fistulosum*)

5gm - \$12; 25g - \$29

Perennial variety to 50 cm, straight leaf with a good sized base. Ideal for salads and cooking. Sow Autumn-Spring.

### **SHALLOTS - Red Beard** (*Allium fistulosum*)

5gm - \$15

Colourful plant to 70cm high producing red stalks up to 30cm Adds colour to fresh foods and cooked dishes. Sow Autumn-Spring.

### **SILVERBEET** (*Beta vulgaris*)

Popular vegetable. Use steamed, cooked & fresh. Likes fertile, well drained, moist soil. Sun to part shade. Sow Autumn-Spring.

#### - Fordhook

Light green leaves to 60cm high, whites stalks, popular variety. Sow Autumn - Spring. 5g - \$9; 25g \$14; 50g \$24; 100g \$42

#### - Rainbow Chard

5g - \$10; 25gm \$15; 50gm \$27

Attractive, nutritious vegetable, stems red, white & Yellows.

#### - Ruby Red Chard

5g - \$10; 25gm \$15; 50gm \$27

Colourful spinach-like plant with red stems and dark green leaves. Attractive garden plant, used as silverbeet.

### ► **SPINACH - Santana** (*Spinacia oleracea*)

Popular baby spinach, with smooth dark green oval leaves and stems. Excellent eaten fresh or cooked and continues to produce fresh leaves as you pick. Fast grower and slow to bolt. Sow all year except during hot weather. Matures after 40 days.

25gm \$10; 50gm \$16; 100gm \$29

### **SPINACH - English Bloomsdale** (*Spinacia oleracea*)

Rich source of vitamins and minerals, eat fresh or steamed. Sow Autumn - Spring. Produces broad dark green leaves, heavy yeilding, good home garden & market garden variety. Withstands heat & cold 25gm \$13; 50gm \$24; 100gm \$42

### **SPINACH - Perpetual Gator** (*Beta vulgaris*)

Large oval, smooth green leaf. Suitable as a baby leaf & full leaf. Good bolting and heating tolerance. Excellent for salads and cooked. Sow Autumn-Spring.

25gm \$3; 50gm \$24; 100gm \$42

### **SWEDE - Champion Purple Top** (*Brassica napus*) 5gm - \$12

Heirloom vegetable with a sweet tasting root ideally eaten fresh or cooked roasted, in soups or stews. Sweetness is enhanced by frosty weather. Stores well once harvested. Sow during Autumn-Winter.

### **WATERMELON** (*Citrullus vulgaris*)

Grown in Spring - Summer. Plant in fertile well drained soil, water well, eat fresh or juiced.

#### - Charleston Grey

5gm - \$14; 25gm - \$38

Oblong fruit to 60cm long x 25cm wide. Thick gray-green rind with darker veins. Bright red, sweet flesh up to 15kg.

#### - Jam

(*Citrullus lanatus*)

Fruit smooth, round, pale yellow flesh. Good bearers, makes good jam.

#### - Sugarbaby

5gm - \$14; 25gm - \$28

Small round fruit to 4kg, excellent bright red flesh, dark green skin. Tolerates cooler conditions.

#### - Warpaint

25g - \$16; 50g - \$28

Popular large melon, red flesh, good flavour, low seed numbers.

### **ZUCCHINI** (*Cucurbita pepo*)

Popular vegetable. Sow direct in good garden soil, full sun, harvest regularly over long period. Use grated fresh or in cooked dishes.

#### - Black Beauty

25gm - \$14; 50gm - \$23; 100gm - \$34

Early maturing, dark green cylindrical fruit, bush variety.

#### - Ronde de Nice

Compact bush variety producing small, round, light green fruit, delicious flavour. Use steamed or baked. Sow Spring - Summer.

#### - Lebanese

Speckled green variety ideal for stuffing due to it having a shorter and stubby shape. Its sweet flavour also allows it to be used as a normal zucchini in stir fries and a range of dishes. Bush variety. 5g - \$12; 25gm - \$24

## Herbs

### ALL VARIETIES LISTED BELOW CAN BE PURCHASED AS SEED PACKETS OR BULK SEED AS LISTED

Packets - \$3.50 each. Members \$3.15 each.

### **BASIL** (*Ocimum basilicum*)

Popular herb, used in salads and cooked foods fresh or dried. Sow Spring - Summer.

#### - Dark Opal

(*Ocimum basilicum purpurea*)

Attractive annual bush to 45cm, with dark red/purple leaves, ornamental plant with lilac flowers and a mild scent. Use as a garnish, colour salads, vinegars, etc. 1gm - \$9

#### - Holy

(*Ocimum sanctum*)

Annual to 60cm tall. Green leaves and stems are commonly used throughout Thai cooking. Grow in full sun position. Sow Spring-Summer.

#### - Licorice

(*Ocimum basilicum*)

Sweet licorice flavour & scent. Purple upright stems to 30cm high, leaves green with attractive mauve flowers. 5gm - \$14
